Projects

DevPilot – AI-Powered Codebase Assistant | Java, Spring Boot, Next.js, PostgreSQL, RAG

- Built a full-stack AI codebase assistant that indexes repositories and enables context-aware developer queries.
- Implemented RAG-based retrieval using vector embeddings and PostgreSQL with pgvector for code search.
- Developed GitHub authentication and a Next.js interface for repository management and AI-assisted exploration.

ChurnShield – Customer Churn Prediction System | Python, Scikit-learn, Pandas, NumPy, Streamlit

- Built a customer churn prediction system with data preprocessing and multiple machine learning models.
- Implemented a Stacking Classifier with SHAP-based explanations for interpretable churn predictions.
- Developed a Streamlit application for interactive churn prediction and model analysis.

WebScholar - Smart Research Assistant | Java, Spring Boot, JavaScript, Gemini API, REST APIs

- Built a Chrome extension that summarizes selected webpage content using the Google Gemini API.
- Implemented persistent, website-specific research notes using Chrome Local Storage.
- Developed a Spring Boot REST backend to connect the extension with Gemini for end-to-end research assistance.
